To whom it may concern,

**I-244-001**

I am writing this e-mail on the behalf of Heidi Jensen. She has learned that there is the possibility of new power lines being placed right though her property, 500 feet from her house. I am very concerned about this for a number of reasons. There may be health risks associated with having power lines so close to her house. Also, Heidi did something extraordinary. Heidi built her own house. For the most part she did not contract work out. She did the work herself! Heidi worked SO hard and did such a great job, it would be devastating to her, after all that hard work, to end up with power lines running though her property. Heidi built her house to save money. Of course after she has lived in her house for many, many years and wants to sell it, her hope was to get quite a bit of money out of her house. If power lines were to run through her property, that would take down the value of her home considerably. I understand that there is another location where these wires can be located - through Hatchet Ranch, Phase II, Lot 38. PLEASE consider this alternative. It would be devastating to Heidi to be forced to have power lines running through her property when she has put her heart and soul (and plenty of sweat and tears) into building her own home. Please find another place to locate these power lines besides through Heidi Jensen's property.

**I-244-002**

Thank you.

Sheryl Israel
